The invasion was carried out by eight military vehicles, including two Merkava tanks and four D9 armored bulldozers, and bulldozed Palestinian lands near the fence. The soldiers, stationed across the perimeter fence, fired many live rounds at Palestinian farmers in Khuza'a town, east of Khan Younis. The farmers were working on their farmlands near the fence when the soldiers attacked them with live fire and several gas bombs. - Israeli soldiers killed a young Palestinian man in the al-Far'a refugee camp, south of Tubas, in the northeastern West Bank. The soldiers killed Younis Ghassan Tayeh, 21, after shooting him with a live round in his heart. The soldiers invaded the refugee camp, leading to protests, and attacked the Palestinians with dozens of live rounds, rubber-coated steel bullets, gas bombs, and concussion grenades. The soldiers also stormed and ransacked the family home of the slain Palestinian and interrogated his family. In addition, the army abducted Odai Tayeh and Maan Amin al-Ghoul, 22,

The colonizers gathered near the junction of the former Homesh colony and hurled stones at Palestinian cars. Other

- The Israeli army intends to use armed drones during invasions into several parts of the occupied West Bank. The commanders of the Israeli army in the West Bank and the Commander of the "Menashe Brigade" underwent training on the operation of armed drones to use in invasions into areas of the West Bank. Division Commanders of the Israeli military in the occupied West Bank will be the persons deciding on using the attack drone during the Israeli military invasions of certain parts of the occupied West Bank. The armed drones will be used in bombing certain areas, dubbed as "difficult"

where the military faces armed resistance from Palestinian fighters when the military invades these cities, towns or refugee camps. The new regulations are likely specifically meant to be mainly used in Jenin and Nablus, where the Israeli army has been encountering armed resistance from Palestinian fighters during Israeli daily military invasions. The drones would be used to specify resistance targets to bomb before the army invades certain areas or during these invasions to assassinate armed resistance fighters and reduce the possibility of exchanging fire with them.
